Endorsed by President Michael V. Drake and the President’s Cabinet

September 3, 2019
Executive Summary

Vision: To be the healthiest university and community on the globe.

Mission: We exist to facilitate the highest levels of wellness for faculty, staff and students across the university and community.

Definition: Wellness is the optimal state of living well, regardless of an individual’s spectrum of health. It encompasses nine dimensions, including physical, intellectual, emotional, social, career, creative, financial, environmental and spiritual well-being.

Rationale: A growing body of research evidence indicates that employees and students who have higher levels of wellness: (a) are more engaged, productive, and satisfied, (b) perform at higher levels, including academics, (c) miss less work and school, and (d) are at a lower risk for the development of chronic disease, which accounts for more than 75% of U.S. healthcare spending. Eighty-four percent of Ohio State faculty and staff believe that it is important for the university to promote and support the health and well-being of all Buckeyes.

2019-2024 Goals:
1. Improve participation in evidence-based programming and interventions so that faculty, staff and students consistently engage in healthy behaviors and attain their highest level of well-being.
2. Implement evidence-based practices and continuous quality improvement in order to decrease the prevalence of chronic diseases, reduce population health risks, and demonstrate value of investment.
3. Strengthen the wellness culture and environment at Ohio State by empowering leaders and managers with wellness resources, strategies, and evidence to act upon so that Ohio State is recognized as a great place to work and learn.
4. Position Ohio State as a national/international leader in university wellness through innovating and sharing best practices.

Structure: At Ohio State, we have developed a unique comprehensive and integrated structure for wellness. Strategic leadership for health and wellness is provided by the university’s Chief Wellness Officer and the One University Health and Wellness Council (OUHWC). The OUHWC is comprised of key leaders from across the university who have responsibility for various aspects of health and wellness for faculty, staff and students, along with representation from faculty, staff, students, and university communications (see Appendix A). The Council is chaired by Ohio State’s Vice President for Health Promotion and Chief Wellness Officer, Senior Vice President for Talent, Culture and Human Resources, and Senior Vice President for Student Life. There are currently five sub-councils under the One University Health and Wellness Council, including an alignment sub-council whose purpose is to ensure alignment of strategic initiatives across the university and the Ohio State Health System.

Framework: The Socioecological Framework and life course perspective guides evidence-based interventions targeted to the individual, social and family network, organizational culture and environment, and policies (See Appendix B).
Strategic Plan Tactics: Our 2019-2024 wellness strategic plan is based on the best evidence from rigorous research that indicates a multicomponent intervention strategy is necessary for best health and wellness outcomes. Wellness initiatives must not only be focused on assisting individuals with healthy lifestyle behavior change through wellness programming and benefit design, but also must include building a wellness culture and environment that make healthy choices the easy choices for individuals to make (i.e., the social norm here at Ohio State). Studies indicate that support and role modeling from leaders and managers along with grassroots involvement from our more than 600 faculty and staff Buckeye Wellness Innovators are critical in facilitating and supporting a wellness culture and environment. Findings from studies also indicate that the institution’s health and wellness policies (e.g., nicotine free; flexible work schedule) is important in promoting healthy lifestyle behaviors. Therefore, our strategic plan includes implementation of interventions directed at the individual, social and family network, workplace culture and environment and policies (see Appendix B). Our implementation priorities are driven by our own population health and well-being data.

Measureable Outcomes: Our current health and wellness scorecard includes three categories of metrics (Appendix C):

1. **Culture and environment of health and wellness**, which is measured with the Ohio State wellness culture survey (Melnyk & Amaya, 2015), the Virgin Pulse well-being assessment, and data from the HealthLead, Health Enhancement Research Organization, and CDC Worksite Scorecard.

2. **Population health outcomes**, including: prevalence data to show the burden of illness in the population; incidence data to capture the rate of change in the burden of illness in the population over time; self-reported health behavior data to highlight actionable interventions; mental health data (PHQ-2 and GAD-2 screening) to emphasize the impact of mental health on physical health; biometric data to assess the impact of behavioral health interventions on risk factors for chronic disease; and self-reported general health status and engagement in programs offered (engagement in programming must be incentivized with more than just completion of the Personal Health Assessment (PHA). Completion of the PHA must be combined with comprehensive evidence-based health promotion programming and the building of a wellness culture and environment.

3. **Fiscal health**, including per member per year (PMPY) costs of health insurance plans for faculty, staff and students, incentive and programmatic spend, annual costs of absenteeism, presenteeism, and disability, and excess costs associated with obesity, hypertension, prehypertension, diabetes, pre-diabetes, depression and smoking. We expect to maintain and/or improve leading health indicators (e.g., obesity, hypertension, depression, and management of diabetes) by 1% each year with our intervention tactics.
### Goal #1: Improve participation in evidence-based programming and interventions so that faculty, staff and students consistently engage in healthy behaviors and attain their highest level of well-being.

Appendix A

The Social-Ecological Framework and Life-Course Perspective Guide Evidence-based Interventions to Achieve the Vision of Ohio State as the Healthiest University in the World

Community & State-wide Interventions
- Community-based Interventions
  - Education
  - Healthy lifestyle programs
- State-wide health & wellness policies
- Television/media
- Million Hearts® screenings & education

Family & Social Network Interventions
- Family programs
- Group classes /programs
- Wellness Challenges
  - Amazing Race
  - Hit the Road with the Buckeyes

Workplace Interventions
- Buckeye wellness programming
- Leader/Supervisor Program
- Buckeye Wellness innovators
- Y4H
- STAR Program
- Ergonomics assessments – standing desks & walking treadmills
- Wellness Wednesdays
- Policies (e.g. tobacco free)
- PR/Communications
- YouTube Evidence-based Health
- Massage

Individual Interventions
- PHA
- Million Hearts® Biometric screenings
- Health coaching
- Diabetes prevention program
- Integrative Therapies
- Wellness on-boarding
- Health Athlete
- Buckeye Babies
- Care Coordination & Disease Management

Outcomes

Individual Outcomes
Health & Wellness Outcomes
- BMI, PHA completion, BP, Lipids, HbA1c, stress, anxiety, depression, injuries, missed work days, healthy lifestyle beliefs & behaviors resilience, chronic disease
- Quality of life
- Engagement in programming

Family Outcomes
- PHA completion, BMI, BP, Lipids, % engaged in wellness programs

Workplace Outcomes
- Healthcare utilization
- Healthcare costs
- Perceived Culture & Environment, % of programs offered with % engagement

Broad Outcomes
- % of community and state-wide programs with engagement
- % of policies
- State health outcomes

The Individual
- Innate traits (e.g., age, sex, biological factors)
- Healthy Lifestyle Beliefs and Behaviors

Across the Life Course
